Company Introduction	<p>Founded in 2000, Bio Protech specializes in medical consumables. As a company that produces essential consumables used in operating rooms, starting with the localization of ECG electrodes, it produces most of the electrodes using hydro-gel based on its own gel development.</p> <p>Recently, through expansion into the Smoke Evacuation System area, we are seeking a change to a company that is more specialized in operating rooms.</p> <p>We achieve 90% of our sales in overseas markets, and have already proven the excellence of our products through the majority of our sales, especially in the US and European markets, and are supplying to several famous multinational companies through OEM. Bio Protech's efforts to provide total solutions for operating rooms will be of great help in expanding the business area of our customers.</p>		
Introduction to Technology & Product(s)	<p><u>EQM-U (Smoke Evacuator)</u></p> <ul style="list-style-type: none"> - Smoke Evacuator Unit - Three procedure operating modes (open tubing, laparoscopic, Electro-surgical) - Fifty hours of filter life - Touch screen based - Multi-port design - Quietest Performance - Includes Foot Switch - EvaQMax Auto (Automatic Activation Device) is an optional feature - Fluid Trap is also an optional feature 		

Telescopic Smoke Pencil

Bioprotech's Telescopic Smoke Pencil was designed with surgeons and cost effectiveness in mind, with features not currently seen in today's market.

With a simple touch of the release button, our pencil can fully extend up to 6 inches to provide better reach for surgeons based on their personal preference.

What makes our pencil unique is while fully extended, the surgeon is still able to visualize the operating field without any obstruction.

Designed for comfort, our thin and light smoke pencil allows surgeons to perform long procedures with no added strain thanks to the attached suction hose's flexibility along with quick and easy extension and retraction.

Our product is also efficient, the air suction hose is able to fit all evacuation pumps and the blades are coated, non-stick ceramics which make it easy to use and simple to clean.
