Company Introduction	<p>Finemedix Co., Ltd. is a medical device manufacturer in which medical personnel directly participate in a form of Prosumer (Product + Consumer). In 2009, beginning product development aiming at the localization of endoscopic surgical instruments, we have localized products such as high functional endoscopic incision, snare, etc. Recognized for their excellence, we supply our products to many university hospitals, large hospitals and clinics in Korea. In addition, we are developing various products in the field of endoscopic surgical instruments and continually plan and develop products that actively represent the ideas of the excellent medical personnel and voices of the field. At the same time, we are growing into a global professional medical device manufacturer while preparing for overseas export through acquisition of CE and FDA certification.</p>		
Introduction to Technology & Product(s)	 <p>Features include Spiral Echo Pattern : Well visible echo pattern on EUS image makes easy positioning of the needle. Needle [A Type] : The back-cut needle is designed for precise targeting and easy insertion into the lesion. [B Type] : Both back cutted bevel type to acquire more tissue with less handling.</p>
